"Those who fail to learn Prolog are doomed to reinvent it."
[Gordon S. Novak Jr.]

Education

2014–2017	**Master degree, Computer Science,** , *University of Bologna*, Bologna, .
	Completed in September/October
2013–2014	**Master degree, Computer Science**, *University of Pisa*, Pisa, .
	Interrupted for educational divergences
2009–2012	**Bachelor's degree, Computer Science**, *University of Bologna*, Bologna, *101/110*.

Master thesis

title	*Development of mobile software for neurocognitive rehabilitation exercises within the planification.*
supervisors	Dot. Mauro Gaspari (mauro.gaspari@unibo.it), Dot. Floriano Zini

Experience

Internship and Conference

2017	**Wolfram Summer School 2017**, *Student*, Boston.
	I had the opportunity to deepen my knowledge of Mathematica and develop a web application, an educational game on Wolfram's language.

Languages

Italian	**Native**	
English	**Upper Intermediate**	*Oxford level B2, University certification*

Computer skills

- Java
- Android
- Javascript
- Python
- C
- Mathematica

Interests

Photography	I have a Canon 600D and i like traveling the world and snapping some picture.
Exploring, Scouting, Hiking	I love mountains, city and discovering the world. Due to my background as a Boy Scout I develop a great passion for adventure and nature.
Boardgames	

Voluntary

A.G.E.S.C.I.	I used being a boy scout since i was eight. Now I'm one of chiefs of my group. My passion for the adventure and my love for nature brought me to the role that I cover. Since 2012 I changed different roles in the association at the beginning I was the chief of pupils, in 2013 I switched to scout and guide (12-16 years old) and right now I'm the chief of Clan, the elder one (17-21 years old). It's difficult sometimes manage all the workload but I truly believe that we must focus on education to young boys/girls in order to achieve a better world where live.
A.N.F.F.A.S.	For three year I spent part of my past summers bringing some patients with mental disease to seaside, helping them in enjoying something different from their routine. It was a strong experience that forced me to keep focus for more than 20 hours a day, but it left me great emotions.
