WINNER

Bose AR + Capitol Records CodeJam

1st-place iOS app integrating the Bose AR iOS SDK and Capitol Records new music streaming API

EXPERIENCE

Fullstack Software Engineering Consultant

JAN 2019 - PRESENT DETROIT, MI

Detroit-based automotive software consultancy. Founded 2017. 40+ employees. Specializing in TDD and XP programming 1. Ford Autonomous Vehicles LLC: Developing iOS SDK in Swift for foundational ridehailing app, creating Uber/Lyft like rider and driver app for the future of Ford autonomous vehicle fleets

STACK: iOS, Swift, Jenkins

2. Ford Fleet Management: Developed Ford's Dynamic Routing as a Service (DRaaS) fullstack fleet optimization and dispatching application servicing Ford AV LLC, Ford's GoRide ridehailing service and employee ride shuttle STACK: Java + Spring, Junit, Hibernate, Pivotal Cloud Foundry, SQL Server, Redis

3. Ford Fleet Simulation: Realtime visual playback portal of real and synthesized ride hailing scenarios, Used to benchamark route solving algorithms and extract business KPIs.

STACK: TypeScript, React+Redux, Mapbox GL JS, RabbitMQ

4. Provide on-the-job training in pair programming methodology and test-driven development to Ford engineers

In addition to the above consulting work, I also work on developing Integral as a start up:

- 5. Recruiting for Integral, including interviewing sotware engineering applicants and social media outreach
- 6. Hosting developer meetups, blogging and participating in scoping potential projects

NEXSYS TECHNOLOGIES (A QUICKEN LOANS COMPANY)

JUN - DEC 2019 DETROIT, MI
