XUAN MINH TRINH

BORN 19 May 1993
Thanh Hoa, Viet Nam

ABOUT ME

I am a math enthusiast and love creativity. I don't have a degree, I just have formulas and theorems. I hope those little things will will useful for the development of mankind.

WORK EXPERIENCE

Been working with geometry since 2009, with about 800 formulas and theorems (including geometry, number theory, identity, inequalities, Diophantine equations). More than half of that belongs to TXM-PI and TXM-HI. The rest are the foundational formulas of Distance geometry (TXM2, TXM5, TXM28, TXM762, TXM763, TXM764...), basic relationship between geometry and algebra (TXM-Δ), a new approach to rational points through basic definitions and theorems of RP theory, the relationship of numbers through the tight system TXM-PI & TXM-HI, the method of integral calculation in triangle geometry (DA theory). There is also **TXM-MOR**, which is based on natural axioms system, which are my efforts in finding the unification of different systems of knowledge.
